

### ***About ARO***

Founded in 1991, Alpine Research Optics is highly regarded as a precision optics fabrication and coatings company and has distinguished itself as a leader in the UV/Laser optics field. Our optics go into equipment/instruments produced by the semiconductor, laser, medical and scientific research industries.

### ***Job Summary***

We are seeking a Quality Inspector who will be responsible for checking the dimensions and surface quality of glass parts. You will be working in a clean laboratory-like environment at an inspection station. You will be expected to read and understand prints and use microscopes, gauges, and other electronic instruments (interferometers) to determine if parts meet their required specifications. You will communicate with other to discuss your findings for rejected parts. The work requires ultra-close attention to the smallest of details. We will train you if you have not previously worked in optics.

### ***Essential Skills and Requirements***

- High School Diploma, GED, relevant vocational training, and/or relevant past experience in quality
- Good eyesight, including near vision and depth perception
- Methodical and detail-oriented
- Organized
- Strong mathematics knowledge and background preferred
- Effective communicator (written and oral)
- Strong work ethic
- Positive attitude
